Interior Wine Room

Ventura International Pvt. Ltd. was conceived in 1994, under the leadership and guidance of young and energetic entrepreneurs who transferred their spirit into the company's wiring ethos. They soon identified the gap in creative needs of interior designers and architects and with that of the materials available in the market, and pledged to fill that with the best the world can offer. Ventura is today one of the leading Importer in an exclusive range of premium interior decorative architectural and interior related products.

The company has an employee strength of more than 30 in their corporate headquarters in Delhi, assisted by 10 sales personnel stationed across the country. The sales network includes more than 100 distributors having sales points in prime locations in all the major cities of India. The marketing network includes direct, and intensive contact with more than 2000 leading Architects & Interior Designers across India.

Ventura's Mission is to satisfy maximum creative needs of the Interior Designers, Architects and Furniture manufacturers in India. It believes in offering the best possible products sourced across the globe which matches the taste and need of every individual.

Ventura is an exclusive Importer and remitter for a range of Metallic Laminates, Hand Made Designer Laminates, Architectural Facade Panels, Woodbased Solid Surface Panels, Embossed Architectural Panels, Faux Leather Tiles and Panels, Self-Adhesive Wooden Wall Panels, Decorative Premium Veneers and many more path breaking products.

These premium architectural surfaces are imported from Germany, Italy, Turkey, USA, United Kingdom, Korea and Portugal. The products are Cosigned for providing the customers with the latest international blend of design and lifestyle.

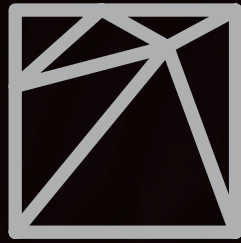

These architectural wines are suitable for a host of application areas including showroom displays, residences, office interiors, multiplexes, outdoor and indoor facades etc.

We now proudly present our innovative interior paneling product – 3D Wall Panels, a futuristic and geometric modular tile system from Turkey. These tiles come in 4 modern shapes and variants, in several colors. The whole system is very dynamic and flexible in terms of installation and appearance. We have showcased this product in the following pages, and hope it finds a place in the designer's interior concept.

THE GENESIS

NORM

PENTA

SPLINE

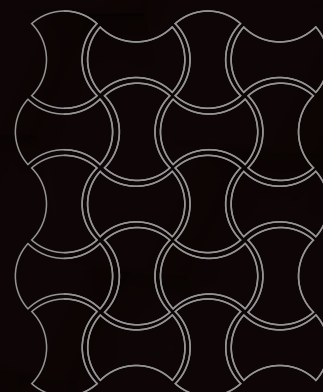

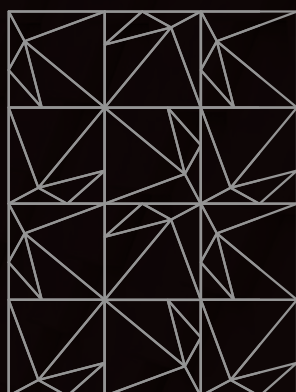

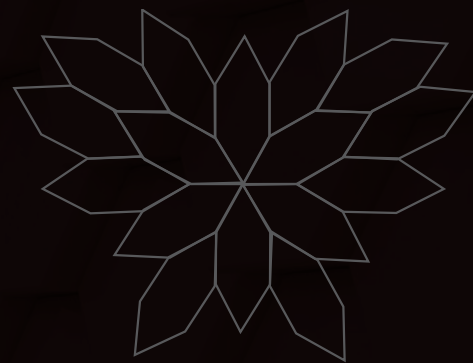

MABEL

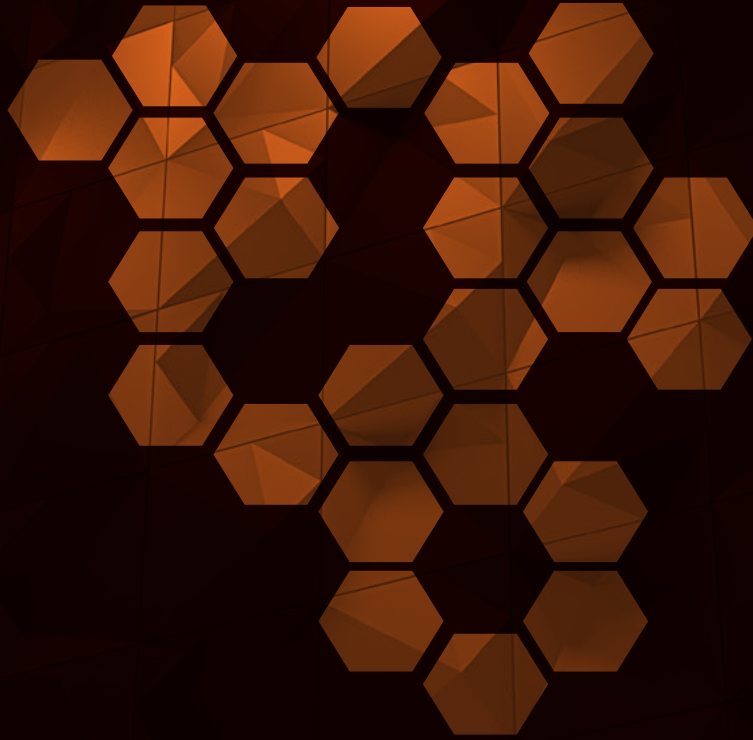

Each of the products from the **3D Wall Panel Systems** collection has its own unique shape. These specific shapes have been derived from the form and structure of the respective product, for **Norm** the hexagonal shape, **Penta** the pentagonal surface, **Spline** the splay lines and **Mabel** the polygonal geometry.

These simplified shapes have been used as a motif to form patterns and have been used in the brochure as inside page elements. For the cover, the derived patterns have been clubbed together to form a uniform pattern which consists all of the four products.

HENCE, THE TAG NAME OF A GEOMETRICAL WONDER

A RĒVOLUTION

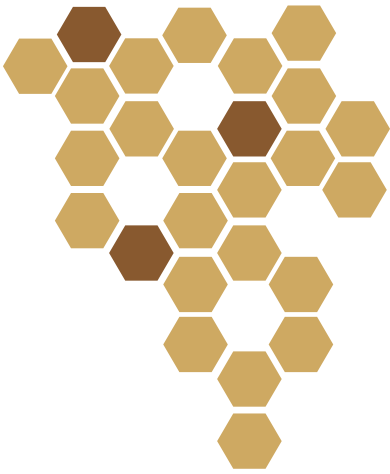

We present the most innovative trend of the decade-**3D Wall Panel Systems** from the House of European designers who have brought a revolution in the world of Architecture and Interiors. These trendy and futuristic tiles are made from high tech special polymer and can have glazed and matte finishes, basis your interior vision. Widely used in both commercial and residential interiors, the tiles and panels come with easy push button system for installation. So now add rich textures to your spaces with our creative, visionary solutions for your places!

MABEL

M A B E L
S E R I E S

— INNOVATIVE PANEL CONCEPT FOR TODAY'S ARCHITECTURE

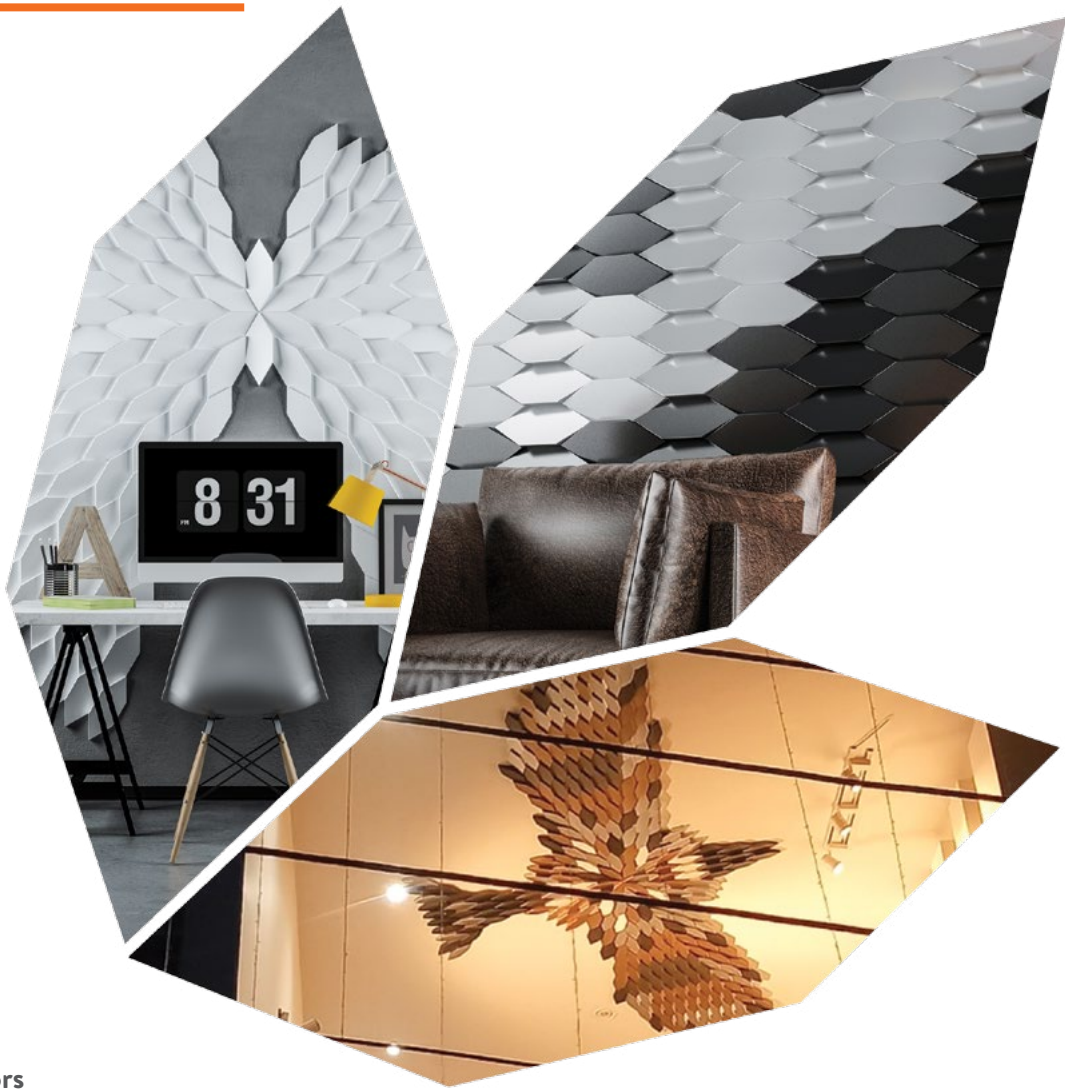

These small polygonal tiles when laid in opposing directions create a subtle geometric stripe. Design of the tile give a sense of depth to the Wall by playing with the lights and shadows created by Mabel's polygonal geometry. This surface-based experimental design approach to a wide variety of contexts and applications in interior design. Shape of the tile creates an illusion of colour shades through the natural reflection of lights.

INDEPENDENT MOVES

A contemporary tile Mabel takes its roots from flower petals which when laid on wide spaces in a great harmony and rhythm appear beautifully symmetrical. We combined cultural heritage of nature with architecture while designing 'Mabel'.

INSTALLATION INSTRUCTIONS

NORM

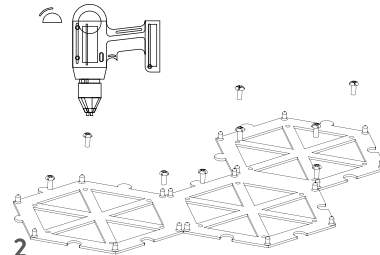

The upper visual part of the fitting is installed on the lower installation part which serves as a frame and has screwing and centering holes. The two parts can be centered to each other easily, by fixing the pin holes of upper visual part to the jags on the lower installation part. The installation method is very simple like the LEGO push button system.

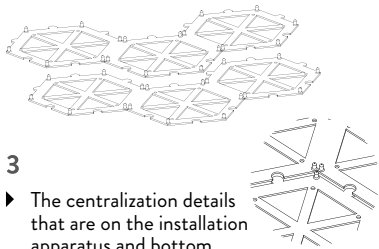

1

- ▶ Start the pasting process by applying silicone behind the bottom apparatus.

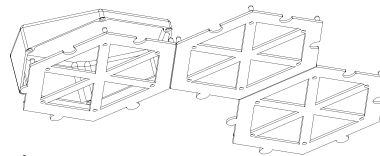

2

- ▶ Once the pasting process is over, strengthen the apparatus by screwing it from determined points.

3

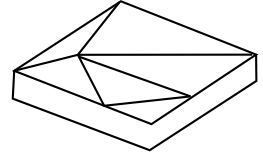

- ▶ The centralization details that are on the installation apparatus and bottom apparatus are attached to each other.

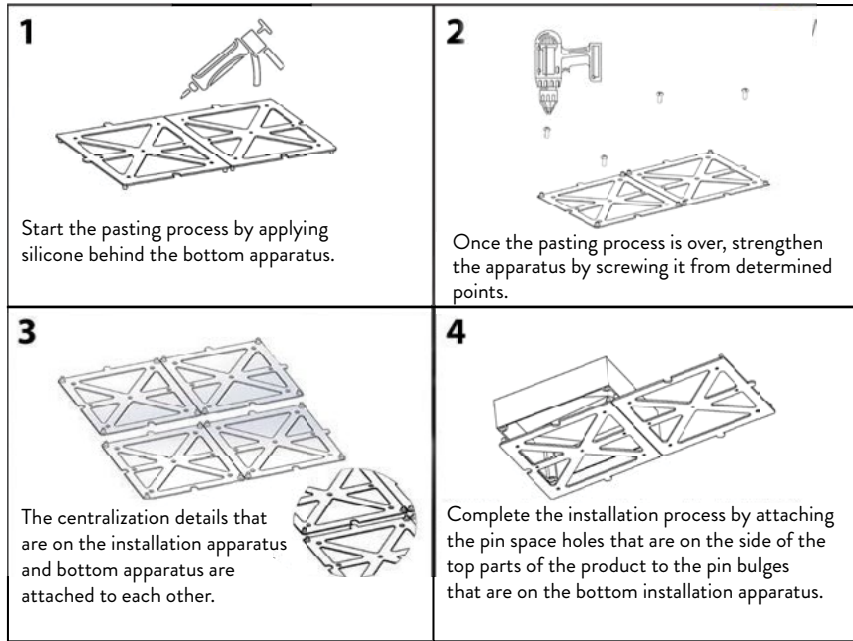

4

- ▶ Complete the installation process by attaching the pin space holes that are on the side of the top parts of the product to the pin bulges that are on the bottom installation apparatus.

PENTA

The upper visual part is installed on the lower part which serves as a frame and has screwing and centering holes. The two parts can be centered to each other easily, by fixing the pin holes of upper visual part to the jags on the lower installation part.

SPLINE

Spline is modular system which can be extended in any direction and custom sizes to suit any spaces.

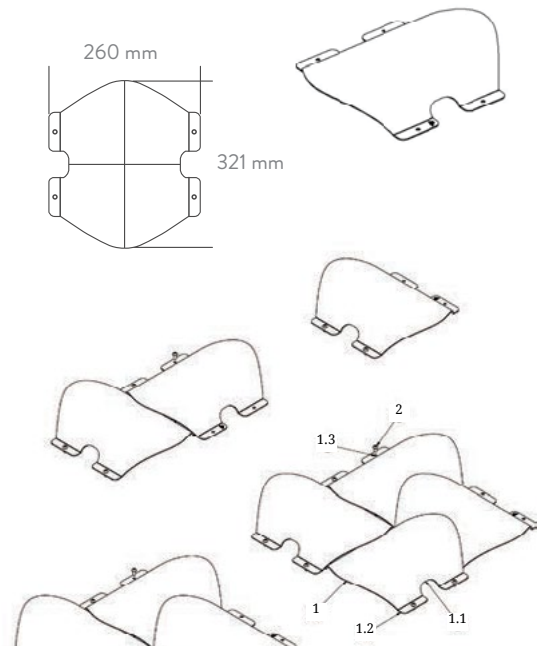

Product installation model shown as follows :

- 1 Oval Product Surface
- 1.1 Lightning (LED) Canal
- 1.2 Assembly Part
- 1.3 Assembly Screw Hole
- 2 Screw

Spline panels can be made even more dynamic and alive by installing LED light strips behind them.

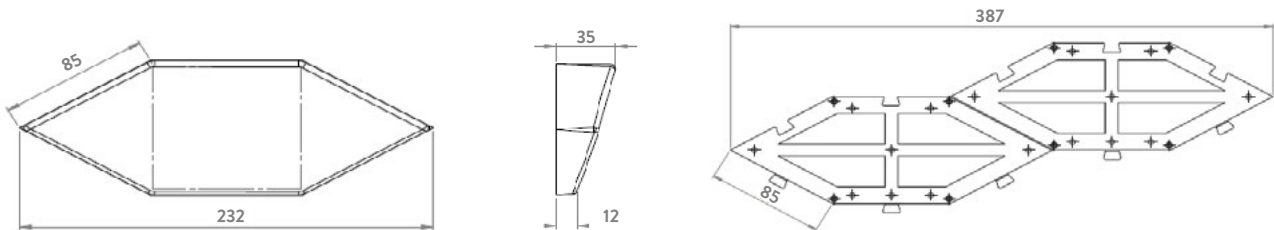

There is no need to install any framework before product installation. Just screw the product on a wall.

Wall surface must be Gypsum/MDF/Wood-Based Surface.

MABEL

The upper visual part is installed on the lower part which serves as a frame and has screwing and centering holes. The two parts can be centered to each other easily, by fixing the pin holes of upper visual part to the jags on the lower installation part.
