## INSTALLATION INSTRUCTIONS

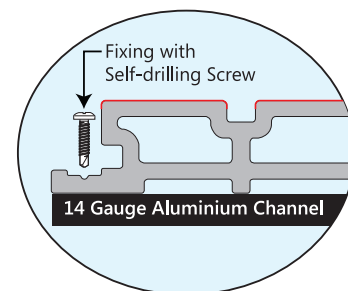

1. Fix the Aluminium Channels at a 300 mm interval to the wall with expansion screws. The spacing between two adjacent screws should be 500 mm.

2. Double Aluminium Channels are needed at the end-to-end joint between two cladding boards to ensure that each board is supported by Aluminium Channel.

3. Leave an expansion gap of about 8 mm between the ends of two cladding boards to avoid the risk of cracking and warping.

4. Always pre-drill pilot holes before driving screws to avoid damage to the cladding board.

**IMPORTANT :** VENTURA LegnoKlad DUO should always be stored horizontally  
• Powder coated End Profile as per requirement • Installation should go from bottom to top
