DURO[®]

RAISING THE BAR SINCE 1957

Style. Sustainability. Tryst. Words that have been evoked in association with Duroply Industries Limited (previously Sarda Plywood Industries Ltd.) since we began our journey in 1957.

Our brand 'Duro' has grown over the decades to become one of the most respected and trendsetting names in the industry. Trusted by engineers, designers and homeowners across India, we are committed to fulfilling their dreams in a sustainable and aesthetically elegant way.

From plywood, to blockboards and veneers, innovation and evolved sensibilities are at the heart of our offerings. Because the only way to a better future, is to make it.

NATURE'S SIGNATURE from DUROPLY

India's largest range of natural premium veneers – Nature's Signature – is produced responsibly and designed to delight.

Favoured by designers across India, these veneers feature pathbreaking technology, and peerless standards of quality and aesthetics.

All of that is achieved without compromising on the planet's health and the well-being of our customers.

BUILDING A DUROBLE PLANET

THE FOREST-FRIENDLY COMPANY

Earth is our home. Our only home. And its future is our responsibility. Everything we do at Duroply is done keeping what's best for the planet at the centre. A large part of that involves managing and preserving our forests.

It takes very little to do that. And the benefits of doing so are essentially endless.

Over the years we have prioritised implementation of world-class systems and processes to mitigate our environmental impact. And we are committed to keep raising the bar on sustainable environment management.

Our pro-planet approach extends to what we make as well, and how we make it. The environment, the workforce, and the community – we strive to make a positive impact on all aspects of our ecosystem.

The FSC certification is considered the "gold standard" designation for wood harvested from forests that are responsibly managed, socially beneficial, environmentally conscious, and economically viable and our product are FSC certified.

E0: Duro's utmost priority is safety of its consumer and its Family members, so all our products comply E0 standards of formaldehyde emission. This protects our factory team, carpenters, contractors and our customers from harmful Formaldehyde Emission, without compromising strength and quality of products.

OHSAS 18001 Certified: Safety of our Factory Teams is non-negotiable. We implement a range of measures to ensure that teams have the best facilities and resources safeguarding them.

VENEER CUTS

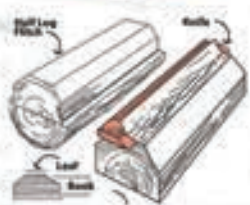

Nature is our greatest creator. When it is combined with expert craftsmanship, magic is made. Our Veneers are cut with precision, in a variety of styles, to form unique patterns yet unseen. Each one is designed to make an impression, one that lasts in time.

Crown Cut

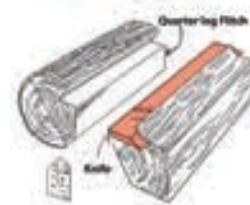

Featuring the mother structure of the timber, the Crown Cut is achieved by cutting tangentially along the growth rings.

Thin, straight grains mixed with cathedrals are an identifying pattern of this cut.

Quarter Cut

One of the more expensive cuts due to lower yield from the log, the Quarter Cut uses a method similar to plain-sliced veneers. Prior to slicing, the log is split into quarters that results in bisected annual rings. Mostly seen in a ribbon-striped style, this cut is often used on Teak, Mahogany, Oak and Walnut.

Rotary Cut

Running a rotating log through a stationary knife is how the Rotary Cut is created.

The process results in a wide, bold grain pattern, and is an efficient way to achieve wonderful results from Birch, Maple, and Oak.

Rift Cut

Mainly used on American Wood, the Rift Cut results in a distinctive striped grain veneer. It is the most expensive cut, and results in the least amount of veneer.

A stay log with a quarter log fixed on it is how the cut is achieved.

MATCHING VENEERS

Book Matching

This style is achieved by turning over successive veneer leaves in a flitch, like pages in a book, and joining them edge-to-edge. Book-matched veneer leaves have alternating 'tight' and 'loose' ends.

Prominent colour variations resulting from difference in the way light is reflected on them gives these veneers a unique look. Most seen in furniture, these veneers add a visible flourish to the design.

Shuffle Matching

Randomly matching individual leaves results in even distribution of characteristics such as knots or gum veins along the sheet. Mix Matching achieves that and allows us the advantage of using veneers from multiple logs to create a panel.

Slip Matching

Veneer layers with uniform colour and appearance are achieved by the Slip Matching method. After 'slipping' successive layers on a flitch, we glue them edge-to-edge to get a series of repeating grains.

Although it runs the risk of resulting in 'lean' panels, the process does lend elegance to the design.

Reverse Slip Matching

Generally used with Crown Cut veneers, this method ensures that crowns are dispersed in a balanced way so that all crowns don't appear bunched at one end. After 'slip matching' the veneers we turn every leaf end-to-end to get the effect.

SIZES

8'x4'

10'x4'

VARIANTS

Veneered Plywood (Standard Thickness 4mm)

Available in thickness ranging from 4mm to 25mm. Veneers can be selected as per your specific requirements. Being ready to use, and easy to install it saves both time and money.

Landscape Veneers

Like true art, the Landscape Collection breaks away from the mundane to explore new expressions of originality. The horizontal grain structure provides a refreshing modern look and the innovative designs give your world a beautiful new perspective.

Flexi Veneers

Lending complete ease of work Flex is an extremely flexible veneered product which makes even impossible application possible. The veneer layer is pressed onto a special paper based backing, in order to achieve this. Flex can be bent, shaped or curved to your desired radius of up to 25mm, giving the designers more choices and fabricators ease of work. Available in all our species. Thickness - 0.6mm

Duro Doors

Duro Doors is the combination of natural beauty and durability. All Duro Doors are crafted from handpicked and well-seasoned hardwood timber. Face Veneer encompasses both side of core ensure high strength with long-lasting durability. Tested on demanding quality parameters all Duro Doors are crafted to add a lot of value to space and also to meet all your safety requirements. Duro have the privilege to offer an array of Veneer Doors that is available in varied styles and sizes.

POLISHING GUIDELINES FOR DYED VENEERS

Special care needs to be taken while polishing Dyed Veneers as it has an inherent property of changing colour after some time.

For Dyed Veneers, we recommend that you use a branded acrylic, water-based, or polyester polish to achieve the best possible finish. Acrylic polish has a unique anti-yellowing agent that ensures that colour of Dyed veneers remains true over time.

We recommend Sirca or ICA polishes. PU and Melamine polish is NOT recommended, especially for Grey tone veneers as it causes discoloration over a period of time.

Please find below few maintenance tips for Dyed Veneer surfaces:

- Clean veneered furniture daily with fully dry and lint-free piece of cloth.
- Always perform the cleaning job with cloth on furniture, exactly in the direction of wood grain.
- Clean the surface of the veneer with a damp cloth, and then wipe it with a dry cloth.
- Avoid making use of soapy or detergent mixed water for cleaning the surface of the veneer, as it can harm the polish of the veneer.
- Use Skilled Professional for polishing, rubbing compound and applying clear lacquer and replacement of veneer.

RECOMMENDED POLISHING GUIDELINES (SIRCA or ICA)

METALLO

LOOKS LIKE METAL, FEELS LIKE WOOD

Metallo Veneers are a revelation in timeless, glossy and glowing shades of grey. An environment friendly technique is being used to produce these unique veneers from genuine wood.

These are available in trendy silver and grey colours with a metallic sheen. Grey can be combined beautifully with many other hues. The innovative manufacturing process mimics the natural discoloration of wood lying in wetlands for ages with a change of colour, which is complete and consistent.

The rustic elegance of Metallo is just irresistible and ideal choice to design your decor!

NEW ARRIVALS

— for the love of —
NATURE

AS PLEDGED IN OUR CORPORATE RESPONSIBLE STRATEGY WITH A CONFIRMED FOCUS ON VALUE CHAIN GHG REDUCTION, INCLUDING RECYCLED CONTENT AND MINIMIZED ENVIRONMENTAL IMPACT:

- THE 2023-24 DURO BOOKLET IS MADE WITH FSC® CERTIFIED PAPER.
- FSC® is an international certification system that guarantees that FSC® labelled paper and wood products come from sustainable and responsible sources.
